10 Why Netlink · Next Steps

"We don't just deliver technology. We invest in communities."

Netlink under our NetSeed skill development initiatives is proud to dedicate this 2-month AI Training Program to DWIHN as a Pro Bono CSR initiative — at zero cost to the Organization.

Community Partnership

DWIHN serves Wayne County's most vulnerable residents. Helping your staff work smarter is our way of giving back to the community you serve.

Investing in People

Technology without training creates friction, not value. We believe DWIHN staff deserve to feel confident and capable with every AI tool we introduce.

Long-Term Relationship

This is not a one-off webinar — it is the beginning of a multi-year AI partnership built on trust, measurable outcomes, and shared mission.

The Opportunity — Why AI Training Now?

DWIHN is at a pivotal moment. The tools are ready. Now our people need to be ready too.

Staff using general web tools

Without guidance, teams reach for consumer AI that can't protect member data — creating silent compliance risk.

Manual reporting overhead

Program managers spend hours on insights that Lumenore Impact can produce in seconds — time stolen from member care.

AI uncertainty and anxiety

Many staff feel unsure whether AI is safe to use or relevant to their role — resulting in either avoidance or unsafe use.

Underutilised Genesys AI

Powerful call-Center AI features are already active in Genesys but largely unused because staff were never shown they exist.

The Answer

A structured, human-Centered AI training Program

- Confident, compliant AI use across every team
- Lumenore fluency for real-time data decisions
- HIPAA-safe habits baked into daily workflows
- Role-specific skills — not generic tech training

Program at a Glance

Everything you need to know about this training — at a glance

12

Live Sessions

1 hour each (spread across 8 weeks)

2

Months

Complete AI enablement journey

10

Modules

Structured curriculum across all roles

100%

Pro Bono

Zero cost to DWIHN

MONTH 1

AI Foundations & Safe Usage

● Module 1: What AI Is — and Isn't

● Module 2: Approved Tools & HIPAA Safety

● Module 3: Data Classification in Practice

● Module 4: Prompting Skills for DWIHN Roles

● Module 5: AI in Your Daily Work

MONTH 2

Advanced AI & Lumenore Mastery

● Module 6: Lumenore Impact Deep Dive

● Module 7: Genesys AI — Call Center Excellence

● Module 8: Objective Decisions with Data

● Module 9: AI Governance & Incident Handling

● Module 10: Certification & Knowledge Assessment

Month 1 — AI Foundations & Safe Usage

5 modules · 4 sessions · Building confident, compliant AI habits from day one

M1 What AI Is — and Isn't

Session 1

Plain-language introduction to AI — how it works, what it can and cannot do, and why it matters specifically for DWIHN and the communities you serve.

- AI as a capable assistant — not magic, not a person
- What AI can help with: drafting, summaries, analysis
- What AI should not be used for and why
- Real examples relevant to care coordination and operations

M2 Approved Tools & HIPAA Safety

Sessions 2

Hands-on walkthrough of every approved tool in the DWIHN catalog — with clear rules for what data can and cannot enter each one.

- The DWIHN Approved AI Tool Catalog in detail
- HIPAA boundaries — the non-negotiable rules
- The four data classification tiers
- What happens when rules are broken — and how to avoid it

M3 Data Classification in Practice

Session 2

Practical application of data classification — helping staff make the right call in real-world situations before they act.

- Public, Internal, Confidential, Restricted — in your context
- The wallet analogy and other easy memory techniques
- Decision scenarios: real DWIHN data situations
- Quick-reference desk card walkthrough

Month 1 — AI Foundations & Safe Usage

5 modules · 4 sessions · Building confident, compliant AI habits from day one

M4 Prompting Skills for DWIHN Roles

Sessions 3

How to write prompts that get useful, safe, and accurate results — with live practice for care coordinators, Program managers, admin, and leadership.

- The 5-part prompt anatomy: Role · Task · Context · Format · Constraint
- Before-and-after prompt examples for each DWIHN role
- Live practice: write your first 3 work prompts
- Common mistakes that produce bad AI output — and fixes

M5 AI in Your Daily DWIHN Work

Session 4

Bringing it all together — structured AI practice for real daily tasks across all DWIHN teams.

- Role-specific workflows: coordinators, managers, admin, compliance
- Reviewing and editing AI output before using it
- Writing emails, summaries and reports with AI assistance
- The daily AI checklist — building safe habits

Month 2 — Advanced AI & Lumenore Mastery

5 modules · 7 sessions · From competency to confident daily application

M6 Lumenore Impact — Deep Dive

Sessions 5, 6, 7

Three dedicated sessions mastering Lumenore Impact — DWIHN's primary analytics AI. From first question to board-ready report.

- Ask Me: typing real questions, reading results
- Working on your first dashboard for your Program
- Service gap analysis by zip code — live practice
- Setting smart alerts and exporting board reports

M7 Genesys AI — Call Center Excellence

Session 8

Activating the AI features already built into Genesys Cloud CX — features that most call Center staff don't know exist.

- Agent AI — Insights and suggestions from registered calls
- Auto Call Summary — stop manual note-taking forever
- Sentiment alerts — catch escalating calls early
- Predictive routing — serving members better from first ring

Month 2 — Advanced AI & Lumenore Mastery

5 modules · 7 sessions · From competency to confident daily application

M8 Objective Decisions with Data

Sessions 9, 10

Moving from opinion-based to evidence-based decisions using AI-powered data — specifically for DWIHN Program and leadership teams.

- Single source of truth — ending data conflicts in meetings
- Reading and presenting AI-generated trend analysis
- Predictive insights — acting before a problem escalates
- Running a data-driven team meeting with Lumenore

M10 Knowledge Assessment & Certification

Session 12

The final two sessions consolidate all learning and issue DWIHN AI Readiness certificates to every staff member who completes the Program.

- Full Program knowledge review — all 9 modules
- Live Q&A: every outstanding question answered
- Individual knowledge assessment (online, 20 questions)
- DWIHN AI Readiness Certificate — issued by Netlink + DWIHN

M9 Governance & Incident Handling

Session 11

How to stay compliant, recognise an incident, and respond correctly — building the governance habits that protect staff and the Organization.

- The AI Governance Committee — who does what
- Recognising an AI incident — and responding within 24 hours
- The 5-step incident response process — hands-on practice
- Manager responsibilities: supporting your team's AI use

Tentative 12-Session Schedule

Spread across 8 weeks · 1 hour per session · All sessions hosted live over Microsoft Teams

Week	Sessions	Module	Topic	Format
Week 1	S1	Module 1	What AI Is — and Isn't	Live Session + Q&A
Week 2	S2	Module 2	Approved Tools & HIPAA Safety	Live Session + Q&A
		Module 3	Data Classification in Practice	Live Session + Q&A
Week 3	S3	Module 4	Prompting Skills for DWIHN Roles	Live Session + Q&A
	S4	Module 5	AI in Your Daily DWIHN Work	Live Session + Q&A
Week 4 & 5	S5,S6,S7	Module 6	Lumenore Impact — Deep Dive	Live Demo + Practice
Week 6	S8	Module 7	Genesys AI — Call Center	Live Session + Q&A
Week 7	S9, S10	Module 8	Objective Decisions with Data	Live Session + Q&A
Week 8	S11	Module 9	Governance & Incident Handling	Live Session + Q&A
Week 9	S12	Module 10	Assessment & Certification	Assessment + Ceremony

Sessions run 1 hour each. Recordings available for staff who cannot attend live. All sessions hosted on Microsoft Teams.

MONTH 1 COVERS AI FOUNDATIONS and MONTH 2 COVERS ADVANCED AI AND LUMENORE

What Staff Will Be Able to Do

Measurable, role-relevant outcomes — not just awareness, but applied confidence

All Staff

- Identify approved AI tools and know when to use each
- Apply the daily AI checklist before every AI task
- Recognise and avoid HIPAA boundary violations with AI
- Report an AI incident using the 5-step process
- Write well-structured prompts that produce useful outputs

Care Coordinators

- Use approved AI tools to draft care summaries and member letters
- Summarise long case documents in under 60 seconds
- Translate communications for multilingual members using AI
- Flag missed engagement alerts via Lumenore smart alerts
- Use Teams AI for automatic meeting action items

Program Managers

- Use Lumenore Ask Me to answer data questions on the spot
- Generate weekly Program performance reports in seconds
- Identify service gaps by zip code using Lumenore maps
- Set and manage real-time Program KPI alerts
- Produce board-ready reports and charts without IT support

Call Center Staff

- Use Genesys AI for call details & transcripts
- Let Genesys auto-summarise calls — end manual note-taking
- Interpret member sentiment alerts from registered calls
- Navigate predictive routing to serve members better
- Use the Genesys knowledge base

Admin & Operations

- Automate recurring reports with AI
- Use AI to improve all written communications
- Draft and edit policy documents and internal memos with AI
- Use AI to produce professional communications materials
- Know which task belongs to which approved AI tool

Managers & Leaders

- Run data-driven team meetings using Lumenore dashboards
- Identify trends and risks before they become incidents
- Make objective decisions backed by real-time DWIHN data
- Support and coach staff on AI questions and incident reporting
- Contribute to the AI Governance Committee reporting process

Delivery Model

How every session is structured, delivered and supported

Every 1-Hour Session — Standard Format

0–5 min

Welcome & recap of last session

5–40 min

Core teaching with live demos

40–55 min

Hands-on practice — staff try it live

55–60 min

Q&A, key takeaways, next session preview

Microsoft Teams

All live sessions hosted on Teams. Link shared 48 hours before each session. Recordings available within 24 hours for staff who miss a session.

Session Recordings

Every session recorded and uploaded to a shared DWIHN SharePoint folder. Staff can re-watch at their own pace — no one is left behind.

LMS Course Materials

Each module accompanied by a structured LMS course with short quizzes, reference cards, and printable job aids. Available 24/7 on the DWIHN or Netlink LMS.

Dedicated Support Channel

A dedicated MS Teams channel for all training questions. Netlink trainers respond within one business day. Peer Q&A encouraged.

Our Trainer Commitment

Netlink-certified AI trainers for every session

Role-specific content — not generic corporate training

Live, hands-on practice in every single session

Full responsiveness to DWIHN feedback throughout

Program Investment

Full commercial value — proudly waived as Netlink's Pro Bono CSR contribution

Service Component	Basis	Value (USD)
12 Live Training Sessions	@ \$1900 / session	\$22,800
Course Design & Curriculum Development	Bespoke 10-module curriculum	\$8,500
LMS Course Materials & Quiz Design	10 modules, 200+ questions	\$4,200
Session Recordings & Post-Production	24 recordings, edited & captioned	\$3,600
Trainer Preparation & Coordination	8 weeks, 2 Netlink trainers	\$6,400
Dedicated Support Channel (8 weeks)	Daily monitoring & response	\$1,800
DWIHN AI Readiness Certificates	Design, issuance, digital verification	\$900
Total Commercial Value		\$48,200

✦ NETLINK PRO BONO PROPOSITION — DWIHN COST:

This Program is Netlink's CSR contribution to the DWIHN community and the people of Wayne County.

\$0

Why Netlink is the Right Partner

We don't just know AI. We know DWIHN.

Netlink

Enterprise AI, Decision Intelligence & Digital Transformation

Lumenore Impact creators · Healthcare AI specialists · DWIHN's implementation partner

We already know DWIHN

Months of collaboration mean our trainers understand your systems, your staff, and your workflows. We don't need to learn your context — we're part of it.

We built Lumenore

We created the platform your staff are using. Nobody can train DWIHN teams on Lumenore Impact better than the team that built it.

Bespoke curriculum

This is not an off-the-shelf AI course. Every module is written specifically for DWIHN roles, using real DWIHN scenarios, data examples and tools.

Outcomes, not slides

Our sessions are hands-on from minute one. Staff leave every session having done something real — not just watched a presentation.

Long-term commitment

This Program is a foundational part of our multi-year partnership. Our goal is to be DWIHN's AI partner for the next decade, not a one-time vendor.

Healthcare AI specialists

We understand HIPAA, data classification, and the unique compliance landscape of behavioral healthcare. Safety is built into every module.

ABOUT NETSEED

NET SEED is an inclusive skill development program designed to implement effective global employment and skills development strategies. It envisages to maximize quality job opportunities via effective policy implementation, innovative practices, stronger capacities and integrated strategies at the corporate level.

Next Steps

Four simple actions to get this Program underway

01

 **DWIHN Leadership**

 Within 1 week

Review this Proposal

We invite DWIHN leadership to review the proposed curriculum, session schedule, and module structure. We are happy to adjust any content to better fit your team's needs and schedule.

02

 **DWIHN + Netlink**

 Within 2 weeks

Letter of Confirmation

A simple one-page letter from DWIHN confirming participation — no contract required. This confirms the Program start date, point of contact, and LMS access arrangements.

03

 **Netlink**

 Week before start

Staff Registration & LMS Setup

DWIHN shares a staff list (name + email + role). Netlink issues LMS invitations, sets up the Teams channel, and shares the full 24-session calendar with all participants.

04

 **Netlink + All DWIHN Staff**

 Agreed start date

Program Kickoff — Session 1

Day one of the 2-month journey. All registered DWIHN staff receive a welcome pack with the session calendar, access links, and a printed daily checklist before Session 1 begins.
